• Camp 1A Chateau U813 - The opportunity to buy a Chateau son with this much performance that combines Chateau's calving ease with Marios growth and Crystal's maternal does not come along anymore at all...as his semen is extremely hard to find. This dark red bull has plenty of eye appeal, will work on heifers and then easily graduate to your cows. His heifer calves will be in demand as replacements and the steers should yield premiums on value base grids.

• Camp 1A Chivalry U829 - Chivalry, the sire of U829, was the 2005 Calf Champion and Reserve Grand Champion Bull at the Nebraska Cattlemen's Classic. He has sired very eye appealing calves for Camp 1A. Most recently one of his daughters was the Champon Red Angus heifer at the Kansas Beef Expo, and she was 2nd in a very tough February class at the 2009 National Western Stock Show. His dam has a 101.7 MPPA and is from the Leachman Olive cow family. He has a very balanced EPD profile that fits the Camp 1A Center breeding program.

• Camp 1A Chivalry U833 is another Chivalry son out of a Grand Canyon daughter. This is another chance to add 2 bulls that will really make a consistent calf crop. This is a younger bull that has proven himself in performance and has an impeccable pedigree. Note the moderate birth, good growth numbers and excellent carcass merit. Not only that but he is out of our phenotypic herd bull Chivalry.

• Camp 1A Mr. C Advance U820. The Advance 121R line of cattle are widely known for growth and muscling, and have surfaced as the leader in terminal cross Red Angus genetics. If you are looking for bulls that will sire stout fast growing calves that will excell in yield based marketing programs, look no further. These calves are big hipped, big topped, heavy boned, dark red, and will really perform. Camp 1A recommends the 121R sired bulls be used in terminal programs. U820 is a herd sire prospect you hope your neighbors will see.
