• Camp 1A Mr. Lancer calves have all been moderate meat machines, that calve easy and have excellent carcass value. U826 is out of a Cherokee daughter, so he is double bred for carcass values. It is extremely tough to get both marbling and large ribeyes but this cross has worked to do just that. Again note the very balanced EPD profile this herd sire prospect offers. We feel that our herd sire Mr. Lancer offers just what the high plains needs in a genetic package. Another benefit of this mating is excellent hair coats in the winter that slick off in the summer.

• Camp 1A Lance U837 combines the length and style of the Leachman Lan cow with the moderation of Lancer. This bulls dam is in our donor pen and was one of our picks out of 100's of cows at the Leachman dispersal in Montana. This is a calving ease prospect that is positive for both marbling and ribeye.

5	-1.0	34	58	17	0.09	0.11	0.00

• Camp 1A Major League U825 is a heifer bull prospect that offers breed average milk and is in the top 35% for both marbling and ribeye. It's not often that you will find a calving ease bull with positive marbling and ribeye numbers. Major League was the record selling Red Angus bull a few years back and has been extremely popular for his balanced traits.

• This group of bulls comes from a recent high selling Major League son in the Buffalo Creek sale in Wyoming. 0842 is out of a cow that goes back to the very stout Monu 2X bull. He started the Thick deep moderate trend of Red Angus. Again note the very balanced EPD profile that fits the Center Breeding Program. Very strong in ALL traits. Should be safe for use on heifers.
