Sharon Springs, KS 67758
Directions on following page.

Schedule

LUNCH – 11:30 AM MTN
SALE – 1 PM MTN

Call anytime to view bulls prior to sale.

WELCOME TO OUR 30TH ANNUAL BULL SALE. We've been selling bulls for over 40 years and have met many great cattle producers and we value our time and relationship with every customer. Buying from an operation is a big decision and we believe developing trust is part of our job as a genetic supplier. We have many contacts throughout the industry and will try to align our customers with the best marketing situation to make you money. Again in 2022 we will host the bull sale at the ranch and the bulls will be shown on video instead of running through the ring. The bulls will be penned and we encourage you to walk through the bulls before the sale. The bulls are very mild mannered, we are known for our **DISPOSITION!**

We are a family operation that believes in **SCIENCE**. Crossbreeding has been a major driver of our operation for years. Not one single breed can offer all the traits it takes to stay profitable in today's complex beef industry. We offer crossbred maternal breed choices that also offer some tremendous growth and carcass merit potential as well. We are always pleased to watch our customers top many feeder calf sales in the area!

Over the last 5-10 years certain breeds of cattle have become very terminal in their breeding. In the chase for terminal sires, many people have seen decreased fertility traits and structural issues. We believe **FERTILITY** is the driver to profits before any other trait. We have averaged 96% pregnancy rates over the last few years during some challenging drought conditions. Our cattle are selected and bred for **FERTILITY** while also performing in the feedlot and on the rail. Over the last 5 years we have fed out our steers and have averaged 95% Choice or higher with 64-65% dressing percentage. We are a proud seedstock partner with Top Dollar Angus and we think there is a great financial return to your operation buying Top Dollar qualified bulls.

We are truly excited by the depth of the bulls this year. We again will be offering a large group of GRU Early Encounter sons that sold extremely well throughout the U.S. last year. Our offering of Red Balancer and Red Angus bulls are robust with some of the 1st sons of Bieber Energize. We are truly proud of Sim x Angus bulls in the offering. If you would like to view the bulls before sale day, please give us a call and we would love to show you through the offering. We will again have our sight-unseen program as noted in the catalog. The bull offering will all be videoed and these videos can be seen on www.grundbeefgenetics.com or www.dvauction.com

Grund Beef Genetics

Sale Information

ACCOMODATIONS

There are several nice motels in the area. If you need assistance please contact us (785) 821-1022 or (785) 821-1104.

Home of HYBRID VIGOR

For over 40 years, **GRUND BEEF GENETICS** has been supplying high quality genetics to the commercial cattleman. Real world cattle that excel in all environments with performance, fertility, and longevity. This is by no accident. A disciplined crossbreeding approach has been utilized to create females with outstanding udders and exceptional feet quality that build the foundation of our cowherd. Combining superior traits from each of our breeds through a selective crossbreeding effort; has allowed our herd sires to serve as an outcross to most current genetics offered today.

You can have more with crossbred cattle. Come join our family,
THE HOME OF HYBRID VIGOR.

EXPECTED PROGENY DIFFERENCES

DO THEY MATTER?

We are proud of the genetic improvement and years of performance data that are showcased in these bulls EPD's. The bulls are weighed and adjusted to the age of the calf. They are put into contemporary groups and then ranked against each other. Once weights are taken, the bulls EPD's reflect the performance information from the bull, his sire, dam and other relatives along with genomic information. EPD's change weekly since breeders throughout the country submit weights and measurements yearly. Taking this information into account, comparison is most accurate when using EPD's instead of individual weights.

I DON'T WANT CALVING ISSUES: 14 and above on CED

I'M ONLY INTERESTED IN POUNDS AT WEANING: 67 and above on Weaning Weight

I BACKGROUND MY CALVES AND SELL AT 800#'S: 100 and above on Yearling Weight

I WANT REPLACEMENT HEIFERS - 20 and above on Milk

UNDERSTANDING *the stamps*

Selection of a bull for your operation is one of the most important jobs that will impact your operation for years to come. Visual appraisal continues to be an important tool when choosing your next herd sire. However, genetic predictions, especially with the progression of genomics has helped us be more accurate in predicting how his calves will perform. We at Grund Beef Genetics believe you CAN have both phenotype and performance! To help on the genetic selection side, we have helped simplify genetic selection this year through these unique "stamps" based upon the EPD's and pedigrees of the bulls selling.

CALVING EASE STAMP

We strive to produce young sires that will rank in the Top 20% of the breed for Calving Ease Direct (CED) that grow fast and add pounds in the right package. CED is the most important indicator to help ensure less difficulties when calving, the bulls with a Calving Ease stamp in the catalog are ones deemed safe for use on first calf heifers.

MATERNAL STAMP

Maternal traits are essential for profitability in the cattle industry. If you are keeping replacement heifers, the bulls with a Maternal stamp have had their dam or granddam receive Dam of Merit or Dam of Distinction honors. Of all cows in the Gelbvieh Association, only the top 5% qualify for Dam of Merit and top 1% for Dam of Distinction!

TOP DOLLAR ANGUS

As referenced throughout the catalog, we are proud to be partners in Top Dollar Angus. To feed a growing world, it's our job as producers to produce a high-quality product. Growth, feedlot performance and carcass merit will continue to be important in the cattle business. Bulls with this stamp qualify for the Top Dollar Angus program with details by their name.

IGENITY - 50K

No matter the goals of your operation, you want to be sure your next herd sire breeds true to his EPDS when making breeding decisions. The Igenity stamp recognizes the bulls that have been 50K DNA tested for genomically enhanced EPD. Bulls with this stamp have higher accuracy EPDs.

BY THE NUMBERS

HEAD
HARVESTED

The **AVERAGE** of all bulls in the sale
RANK IN THE TOP 30% OF THE BREED
for the following traits:

CED • WW • YW
MK • MARB • FPI

UNDERSTANDING THE *Feeding*

All the bulls are fed at **GRUND BEEF GENETICS** – which allows us to keep the cattle in their natural surroundings and away from other feedlot cattle that could expose the bulls to numerous diseases found in a feedlot setting. The bulls also have a large pen for exercise. The bulls are weaned on a moderate energy ration and then are fed a denser ration for November, December and January. The bulls are weighed and ultrasounded the first of February and then are moved back to a moderate energy ration until sale time.

We feel that 90 days of feeding a denser feed allows the bulls to sort themselves in terms of growth traits which is reflected in their EPD's once weights are taken. The bull's individual weights and pedigree helps determine his EPD's. Our bulls typically ultrasound 0.15 to 0.20 backfat and are ready to breed cows at turnout time!

FEED	AS FED/ #'S PER DAY	% OF RATION
Sorghum Sudangrass	6.5#	17%
Corn Silage	16#	42%
Wet Distillers grain	11#	30%

GRU 785J- Homo Polled - Homo Black - One of our favorites since he was born. Join the Journey was named for himself and the sons of GRU Early Encounter 536E. The Encounter sons are some of the highest selling bulls in the country. 785J is a great looking, stout, sound structured bull that is full of rib and true dimension. 785J comes from a terrific John 316 daughter that is backed by the great GRU Annie 334A donor cow as a grandmother. Tremendous maternal genetics. A full brother was a top selling bull in 2021. Ranks in the top 35% of the breed for Calving Ease, Top 20% of the breed for growth traits and top 30% of the breed for carcass traits.

GRU 714J - Homo Polled - Wow. We like this one a lot! Just N Time is a great Red Balancer bull that is out of a terrific cow that has ratioed 110 on her calves at weaning. Sired by the great Bieber Energize bull featured by ABS. 714J is unique in ranking in the top 10% of the breed for calving ease, top 10% of the breed for growth, milk, and FPI. A great looking, massive bull, that is sound and has a terrific disposition. We plan to use this bull in our Red Program and want to collect semen before he leaves the ranch. Remember we are keeping a 50% semen interest in all bulls - Full Possession and the other 50% semen interest sells to you the buyer.

Red Angus n 787J is a nice, heifer bull prospect. He ranks in the top 5% of the breed for calving ease and top 25% of the breed for Herd Builder.

We keep a great selection of bulls for sale during the spring. Make sure to contact us if you need additional bulls.

Top Dollar Angus Feeder Calf Program

Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior feeder cattle, coupled with genetic risk mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

How it Works:

Our program begins with a FREE genetic evaluation based on the current/past herd sires used in your program. We evaluate the sires used in your herd based on their growth and carcass merit characteristics. A herd that qualifies for Top Dollar Angus has cattle that are at least 50% Angus or Red Angus and also ranks in the top 25% of its respective breed for growth and carcass merit.

Once qualified, our team provides boots on the ground to share this valuable information with buyers looking for high quality cattle that will go on feed and perform. Our team has experience coast to coast and works directly in all channels (video, local auction, direct and internet). Plus, we have the resources to provide a very fast turn-around.

What our Customers Say:

"Top Dollar Angus is a program that benefits all levels of the industry. The seedstock producer is rewarded for providing superior genetics to the commercial cattleman, who in turn supplies the feeder with efficient cattle that will produce top-end carcasses. As Top Dollar Angus continues to raise their qualifying standard, these cattlemen will have to up their game to purchase the genetics that will fit the program. These cattlemen will see a return on investment when offering reputation feeders at market time."
