## *Schedule*

LUNCH – 11:30 AM MTN  
SALE – 1 PM MTN

*Call anytime to view bulls prior to sale.*

## WELCOME TO OUR 34<sup>th</sup> ANNUAL PRODUCTION SALE

We look forward to seeing you on Wednesday, February 25th. The bulls look outstanding, and we are excited to share the new genetics we've incorporated over the past year. For more than 40 years, we have had the privilege of supplying genetics to some of the best cattlemen across the High Plains. We value the relationships we've built and take pride in producing cattle that work in real-world operations. Our herd visits with customers provide valuable insight into what drives profitability, and we continually apply that knowledge to improve our program.

At Grund Beef Genetics, our goal is to be your trusted genetic supplier and long-term partner. We believe strongly in **CROSSBREEDING**—because hybrid vigor is REAL, measurable, and profitable. Adding an additional 40 pounds at weaning and extending cow longevity by two years through improved fertility makes a meaningful difference. With today's smaller cowherd, the market continues to reward pounds at weaning, yearling performance, and heavier carcass weights—and our genetics are designed to meet that demand.

Everything we do starts with the **FEMALE. FERTILITY** is the single most important driver of profitability, and getting cows bred, every year, matters. Once again, our cowherd ranks in the Top 10 breeders in the U.S. for **DAM OF MERIT** females. This recognition is earned by only 5% of cows nationwide and reflects superior calving consistency and production records.

We are more than just a bull supplier. Alongside our seedstock program, we run a commercial cowherd and retain ownership through the feeding phase. Over the past 10 years, our steers and cull heifers have proven they perform all the way to the beef consumer. On a three-year average, our steers achieved 97% Choice or higher, a 945-pound average carcass weight, and just 1.5% death loss through the feedlot.

In 2025, grid premiums on our fed cattle ranged from \$100 to \$200 per head on the USPB grid. We were honored to receive Champion Overall Balancer Steer at the American Gelbvieh Feeding Trial. Our Just N Time-sired steer gained 5 pounds per day, produced a 1,120-pound carcass, graded Prime, and grossed \$4,300. We also continue to be a Top Dollar Angus supplier—please see the catalog for information on marketing Top Dollar Angus feeder cattle.

Our genetics continue to make an impact beyond our program. In 2025, Just N Time was recognized as the top A.I. sire for Balancer cattle. We are fortunate to have family members working throughout the beef industry, with connections in animal health, specialty feeder cattle programs, and risk management tools. We are always willing to help customers navigate these opportunities. We will again offer volume discounts on bulls—details are outlined in the catalog—as well as our sight-unseen purchase program. All bulls will be videoed and available for viewing at [www.grundbeefgenetics.com](http://www.grundbeefgenetics.com) and [www.dvauction.com](http://www.dvauction.com).

**JOIN US FOR AN OPEN HOUSE TO PREVIEW THE BULLS ON FEBRUARY 21ST AND 22ND.** Details will be posted on our Facebook page. We are also planning a customer meeting and meal on the evening of the 21st to discuss LRP, Top Dollar Angus, and additional marketing opportunities. Our goal is simple: help our customers capture more value from every calf they raise.

We look forward to seeing you on February 25th. A sincere thank you to Scoular Grain for helping sponsor our sale-day meal!

**WE LOOK FORWARD TO SEEING YOU ON WEDNESDAY, FEBRUARY 25TH!**

*— Grund Beef Genetics*

# Sale Information

**ACCOMODATIONS** There are several nice motels in the area. If you need assistance please contact us (785) 821-1022 or (785) 821-1104.

**TERMS & CONDITIONS** All cattle sell under the standard Terms and Conditions for each respective breed association.

**SEMEN INTEREST & POSSESSION** The seller is retaining 50% semen interest on all bulls in the sale. Buyer is getting full possession and 50% semen interest. The semen interest is only being retained in case a bull is identified as a superior individual and the breeder wants to go back and collect semen for our use or other breeder use. In the case we choose to collect semen we will work with the new owner and schedule the collection around your schedule. We rarely exercise this option, but with progression of DNA technology we may want to utilize genetics you are buying.

**PHONE BIDS** If you are unable to attend the sale, please contact any of the sale representatives, auctioneer or owners. They will handle your bids confidentially and as if you were in attendance. You may bid online at [DVAuction.com](http://DVAuction.com).

**ANNOUNCEMENTS** All announcements made from the auction block sale day take precedence over any printed material in this catalog.

**INSURANCE** Livestock Mortality Insurance will be available sale day with Coffman Liggett, (540) 383 - 7134.

**VIEWING** The bulls can be viewed any time – please call, (785) 821-1022.

**TRUCKING** Direct concerns to the seller of the bulls for assistance in trucking cattle have proper papers for interstate shipping.

**DVAUCTION** 1. Create an account at [www.dvauction.com](http://www.dvauction.com) under the "create new account" tab. 2. Apply for bidding by clicking "apply for bidding" in the upper left corner of your screen, at least 24 hours prior to the auction. 3. Tune into the sale and make your purchase! For general questions please contact our office: (402) 316-5460 or [support@dvauction.com](mailto:support@dvauction.com). High speed internet access is required.

**GUARANTEE** All bulls selling for \$4000 or more are guaranteed for the first breeding season. A breeding season is defined as a 90-day period following the first turn out date of the bull. This is not an insurance policy. If a bull develops a problem, proper treatment or vet care is advised. If a replacement bull is available, he will be provided. If the buyer prefers no replacement bull, we will provide credit towards another bull in the following year, less the salvage value of the injured bull. Please notify us as soon as possible should a death or injury occur.

**SIGHT- UNSEEN GUARANTEE** If you are unable to attend the sale, we are offering a sight – unseen-program. We also will be broadcasting the sale on DV Auction to allow you to see a video of the bulls selling. We have also arranged a different set of eyes to talk to you about the bulls. These guys will give you an honest opinion on the bulls. Nick Wells 785-443-0233 and Jim Williams, 308-222-0170.

## EXPECTED PROGENY DIFFERENCES

### DO THEY MATTER?

We are proud of the genetic improvement and years of performance data that are showcased in these bulls EPD's. The bulls are weighed and adjusted to the age of the calf. They are put into contemporary groups and then ranked against each other. Once weights are taken, the bulls EPD's reflect the performance information from the bull, his sire, dam and other relatives along with genomic information. EPD's change weekly since breeders throughout the country submit weights and measurements yearly. Taking this information into account, comparison is most accurate when using EPD's instead of individual weights. Over 99% of bulls are genomic tested for EPD's - genomic testing improves accuracy 20%.

**I'M ONLY INTERESTED IN POUNDS AT WEANING:** 70 and above on Weaning Weight

**I BACKGROUND MY CALVES AND FEED MY CALVES TO FINISH:** 110 and above on Yearling Weight

**I WANT REPLACEMENT HEIFERS -** 23 and above on Milk

**I'M USING BULLS ON MATURE COWS:** 8 to 13 on Calving Ease  
(actual birthweight of 78-90 lbs.)

**I'M USING BULLS ON REPLACEMENT HEIFERS & 2ND CALF COWS:** 14 and above on Calving Ease  
(actual birthweight of 60-77 lbs.)

# Understanding

## COAT COLOR REFERENCE

**HOMO BLACK:** All Calves will be black. Bull was DNA tested or was born by Homo Black parents.

**DOUBLE BLACK & RED CARRIER:** All Calves will be black. Bull was DNA tested or was born by Homo Black parents.

**BLACK & RED CARRIER:** Bull is black hided, was DNA-tested as red carrier, and has at least one red-hided parent.

# UNDERSTANDING *the stamps*

Selection of a bull for your operation is one of the most important jobs that will impact your operation for years to come. Visual appraisal continues to be an important tool when choosing your next herd sire. However, genetic predictions, especially with the progression of genomics has helped us be more accurate in predicting how his calves will perform. We at Grund Beef Genetics believe you CAN have both phenotype and performance! To help on the genetic selection side, we have helped simplify genetic selection this year through these unique "stamps" based upon the EPD's and pedigrees of the bulls selling.

## CALVING EASE STAMP

We strive to produce young sires that will rank in the Top 35% of the breed for Calving Ease Direct (CED) that grow fast and add pounds in the right package. CED is the most important indicator to help ensure less difficulties when calving, the bulls with a Calving Ease stamp in the catalog are ones deemed safe for use on first calf heifers.

## MATERNAL STAMP

Maternal traits are essential for profitability in the cattle industry. If you are keeping replacement heifers, the bulls with a Maternal stamp have had their dam or granddam receive Dam of Merit or Dam of Distinction honors. Of all cows in the Gelbvieh Association, only the top 5% qualify for Dam of Merit and top 1% for Dam of Distinction!

## TOP DOLLAR ANGUS

As referenced throughout the catalog, we are proud to be partners in Top Dollar Angus. To feed a growing world, it's our job as producers to produce a high-quality product. Growth, feedlot performance and carcass merit will continue to be important in the cattle business. Bulls with this stamp qualify for the Top Dollar Angus program with details by their name.

## IGENITY – 50K

No matter the goals of your operation, you want to be sure your next herd sire breeds true to his EPDS when making breeding decisions. The Igenity stamp recognizes the bulls that have been 50K DNA tested for genomically enhanced EPD. Bulls with this stamp have higher accuracy EPDs.

# MATERNAL SUPERIORITY

Our number 1 goal at **GRUND BEEF GENETICS** is to provide you with the highest quality herd sire that will add profit to your bottom line. Not only do these herd sires excel in the economically relevant traits that will add value to your calf crop, but they are backed by some of the most prolific mothers within the breed.

The American Gelbvieh Association honors females in the herdbook that display fertility and maternal superiority through the Dam of Merit program. Of the 40,132 active cows in the AGA herdbook, only 5% of the females qualify. **GRUND BEEF GENETICS** and family rank **10<sup>th</sup> amongst all active breeders for total number of Dam of Merit Females**. All great cowherds start with a strong foundation, rest assured these bulls are backed by some of the best females in the breed.

# UNDERSTANDING THE *Feeding*

All the bulls are fed at **GRUND BEEF GENETICS** – which allows us to keep the cattle in their natural surroundings and away from other feedlot cattle that could expose the bulls to numerous diseases found in a feedlot setting. The bulls also have a large pen for exercise. The bulls are weaned on a moderate energy ration and then are fed a denser ration for November, December and January. The bulls are weighed and ultrasounded the first of February and then are moved back to a moderate energy ration until sale time.

We feel that 90 days of feeding a denser feed allows the bulls to sort themselves in terms of growth traits which is reflected in their EPD's once weights are taken. The bull's individual weights and pedigree helps determine his EPD's. Our bulls typically ultrasound 0.15 to 0.20 backfat and are ready to breed cows at turnout time!

FEED	AS FED/ #'S PER DAY	% OF RATION
Sorghum Sudangrass	6.5#	27%
Corn Silage/ Whole Corn	16#	42%
Wet Distillers grain	11#	30%

Homo Black – Homo Polled – Noah 3301N is a exciting unique herd bull with outcross Balancer genetics. Sired by the popular ST Sire - Rapport. 3301N is thick, deep bodied, great moving and good looking! Rapport is a trait leader for exceptional feet and claw in the Angus breed and 3301 is excellent in his foot shape. Dam is a terrific 1st calf heifer that weaned a 753# bull calf that started at a 77# birth weight! We intend to use this bull in our own cowherd due to his outcross pedigree and excellent EPD's. Noah 3301N ranks in the top 15% of the breed for calving ease, weaning, and yearling weight EPD. Top 10% of the breed for marbling and FPI. Just N Time and Early Encounter are bulls we have sold in the past that had a big impact on our breed - Noah reminds us of Just N Time and Early Encounter!

Homo Black – Homo Polled –Next Up 216N is another exciting unique herd bull with outcross Balancer genetics. Sired by the popular ST Sire - Sitz Eternity. Performance, power, thickness and great design are all words that describe Next Up 216N. Next Up ranks in the top 5% of the breed for weaning, yearling, carcass weight, and FPI. Started out at 80#'s birth weight with a 812# weaning weight - out of a 2nd calf heifer. Granddam is a Dam of Merit cow. We plan to use this sire in our own herd due to his outcross pedigree and excellent EPD's. He was named Next Up for a reason!

# PERFORMANCE IS KING

## *the difference pays*

### **POUNDS PAY THE BILLS.**

The quality of pounds determines the premiums of your feeder and fat cattle.

### **PERFORMANCE REMAINS THE KEY FACTOR**

whether you get paid at weaning, backgrounding or finishing. The napkin math is simple, pounds pay in every segment of the industry.

## CHOOSING THE RIGHT BULL

Sale days can be stressful—we get it—and our goal is to help every customer find bull genetics that move their operation forward. During our Open House on February 21–22, we take time for one-on-one conversations to learn each producer's goals and budget, because every operation is different and deserves that respect.

To simplify the process, we help customers build a Top 10 bull list and narrow it down to 3–5 bulls that fit their program and budget, without stretching either.

## CHOOSING THE RIGHT BULL

Sale days can be stressful—we get it—and our goal is to help every customer find bull genetics that move their operation forward. During our Open House on February 21–22, we take time for one-on-one conversations to learn each producer's goals and budget, because every operation is different and deserves that respect.

To simplify the process, we help customers build a Top 10 bull list and narrow it down to 3–5 bulls that fit their program and budget, without stretching either.

### LAYAL GRUND MEMORIAL 4-H SCHOLARSHIP

**LOT 74** is our choice of the Loyal Grund Memorial 4-H Scholarship. 50% of the proceeds on Lot 74 will fund 4-H scholarships for students in Western Kansas, Eastern Colorado. Loyal Grund was proud to live in western Kansas and always supported the 4-H program. Loyal always liked good disposition cattle and Lot 74 was chosen for his great disposition. Loyal truly enjoyed visiting with our bull customers and seeing the genetics advancements made each year. Loyal always said good disposition cattle made the cow business enjoyable. Information on the scholarship can be found at [WWW.GRUNDBEEFGENETICS.COM](http://WWW.GRUNDBEEFGENETICS.COM).
